The World In Danger

As week succeeds week the possibilities of war between Italy and Ethiopia grow nearer to certitude and the situation becomes fraught with alarming menace, not merely to the two countries involved but to other countries and possibly the whole civilized world.

With the Italian representatives rejecting, one after another, proposals which are being made almost daily by committees of the League of Nations and interested powers in the hope of averting an outbreak of hostilities, and Italy's ally, San Marino, has joined in the demand for peace, which would result in the surrender of the independence of his kingdom, the situation becomes more and more gloomy, and the gloom deepens with the active preparations which are being prosecuted by Mussolini and the belligerence with which he is whipping his countrymen into a warlike attitude.

Since the League of Nations and the world's most important authorities appear to be in complete accord with the general consensus of world opinion that such a conflict would not be confined to Italy and Ethiopia, but that other nations would be dragged into the fray and that it is even likely to lead to a general conflagration which would result in misery and suffering to millions and loss of life and property on an even greater scale than in World War I.

Indeed, there are authorities who see in the present situation a potential destruction of civilization itself. This view is supported by the Committee on International Law of the Canadian Bar Association, which in a report to the Canadian Bar Association convention in Winnipeg recently spoke of "the consequences to the world and Canada of an actual resort to arms" as "catastrophic in the sense that it may include the destruction or profound modification of many of the institutions upon which civilization is based."

Again in the same report, the committee dealt with the conduct of Italy as indicating that government's unwillingness to accept decisions of the Council of the League of Nations, of which she is a member, in the following words:

"If that attitude persists the world may be faced with a complete breakdown of the system of public international order which was supposed to have been permanently established by the sacrifices of the years 1914 to 1918."

"The question is whether or not the world will permit this by failure to agree on united action or whether, by united action, they will, upon the continuation of our present civilization, be compelled to do so."

The statement that the peoples of the world can avoid this catastrophe by united action refers to the powers which the member countries of the League vested in themselves when they approved Article 16 of the covenant, to which all members have subscribed, agreeing to impose financial and economic sanctions as a punitive measure against any member who breaks the covenants and commits an act of aggression against any other country.

In view of the menace of the situation the importance of these powers becomes paramount. They are contained in the first and third paragraphs of Article 16 and read as follows:

"1. Should any Member of the League resort to war in its defense, or if it acts in its defense, or if it should ipso facto, be deemed to have committed an act of war against other members of the League, which thereby undertake immediately to subject it to the severance of all trade relations, the prolongation of which would be prejudicial to the peace and welfare of the League, the prevention of all financial, commercial or personal intercourse between the aggressor and the combatant, the aggressor and the nationals of any other State, whether a Member of the League or not."

"2. The Members of the League agree, further, that they will mutually assist one another in the maintenance and economic measures which are taken to effect this. In order to facilitate the carrying and inconvenience resulting from the above measures, and that they will promptly take such action in respecting any special measures aimed at one of their number by the League or by the States, as will take the necessary steps to afford passage through territory to the vessels, adjusting and arranging a proportionate arrangement of that required the study of a large engineering staff.

A large engineering staff of the members has been set up at the shipyard, furnishing an accurate picture of the successive rows of plates and a laboratory for the study of the details of construction which are carried out on a larger scale on the ship itself.—New York Times.

A Great Astronomer

Dr. Anna Cannon Has Classified Over 400,000 Stars

That astronomy is not so exact a science that the average man would not be interested were information readily available, is the opinion of Dr. Anna Cannon, of Harvard, who was in Toronto as a delegate to the American Astronomical Society's convention.

For 50 years Dr. Cannon has been gazing through telescopes at the mystery of the heavens as a great thrill for her as ever. Dr. Cannon is the most famous woman astronomer in the world, and she has shared with Madame Curie of France and Dr. Maria Mitchell of America the equally famous honor of receiving the Elliot Richardson prize for outstanding work in women in research.

She was the last recipient of the prize, which was founded in 1911 to study women in science. But because it was felt women no longer needed encouragement to enter, it was discontinued. Dr. Cannon has continued it, however, for women in astronomy. It is the only award given to women, and goes to women astronomers.

The prize was given Dr. Cannon for classification of stars according to their spectra. She has classified over 400,000. Harvard is now a mecca for astronomers all over the world who seek astronomical observations of spectra.

An Intricate Problem

Joining Of Steel Plates On Lurru Queen Causes Engineering Study

Construction of the new Cunard White Star super liner Queen Mary has been complicated by reason of the fact that no two of her steel plates are exactly the same size. The plates were shipped at Clydebank. Most of the plates are curved, and many of them are more than 36 feet long, 6 feet wide and more than an inch thick. Few are really flat.

A large engineering staff of the members has been set up at the shipyard, furnishing an accurate picture of the successive rows of plates and a laboratory for the study of the details of construction which are carried out on a larger scale on the ship itself.—New York Times.

Created Russian Scientist

Has Done Much To Extend Study Of Nervous System

Both Tsarist and Bolshevik Government have sought to honor the great Russian scientist, Prof. Ivan Pavlov, says the News of the World. No one living has done more to extend the study of the nervous system of man and animals and particularly knowledge of the connection between brain and digestion. He was awarded the Nobel Prize for this work as long ago as 1904. Last year when he was 82, the Soviet Government gave him 300,000 rubles, plus a laboratory for him. It now pays the old man, who was the son of a poor village priest, £2,000 a year, and, according to H. G. Wells, he is the only man who dare answer Staln back.

New Variety Of Dahlia

A Siamese-twin dahlia, which may be the forerunner of this autumn flower, was displayed at Victoria recently. The flower, grown by Mr. W. G. Gordon of Sooke, B.C. It is two flowers joined together at the base. The dahlia is of the pompon variety and the back-to-back flowers almost form a small ball of pink petals. Plant experts termed it a queer aberration of nature.

Village Needs Pied Piper

Gentry rate a night and being killed in the village of Chipping Norton, England, where the last water-fowl, but explained it was used to release the result of his survey until he had reported to his government.

Nestling places of duck and geese on the various lakes as far north as Fort Ross were surveyed.

To help teach orthopaedic children music at residence of Portland, Ore., have invented a piano that plays with a staff to which magnetized paper notes can be fastened.

Women Like Combines

We'll wager the farmers' wives are glad that threshing is over. At the Jess Denton farm in Alma, Kansas, there were 31 men for dinner and 27 for supper, while the housewives, who were the ones the big combines were used, three men harvested 165 acres in a day. That is one place where the machine lessens the load for the women.

2117

Gas Test Well

Great Activity Shows In Hudson Bay Junction Territory

Amalgamated Oils Ltd. brought in the fourth gas test well on the Kakwa structure recently. The flow was encountered at 275 feet, the gas being 90 per cent methane. Gas was found in other wells, says a report from Hudson Bay Junction.

The four holes have been drilled largely with a view to the location of oil and gas on the structure, which is very likely to be a test for oil somewhere in the Peaceful Hills is now considered justified.

It was stated unofficially that the Senator Oil and Gas Development Co. has engaged a drilling rig to Hudson Bay Junction and that drilling for oil on the structure where the Trail Blazer Company put down a hole last year. This structure is near Hudson Bay Junction and quite distant.

Rare Animal From Africa

Okapi In London Zoo Looks Like Miniature Giraffe

Leo, one of the rarest animals in the world, has taken a prominent place in London Zoo Society.

Leo comes from Africa and is the only Okapi in Europe. An Okapi (O-kah-pee) is a small animal (approximately the size of a pony), includes in equal proportions the characteristics of the giraffe, the deer and the zebra. He looks like a miniature giraffe.

One of the newest exhibits at the London Zoo, Leo has almost to the point of extinction by the piggies of the Lutri forest with their deadly 2 miles distant.

Hurts Coal Industry

Bitter Complaint Against Natural Gas Competition In Alberta

Use of natural gas in Edmonton last year depressed mines of a major producer of coal, the Alberta Mining and Smelting Co.

Baron von Smolinski, English

authority on collieries, was told as he had been investigating of Alberta's coal industry. Bitter complaint against natural gas competition came from the Alberta Mining and Smelting Co. Reid counsel for 10 coal companies. Mr. Reid also informed Sir Montague that truck and bus competition to railways has reduced the market for steam coal.

FASHION FANCIES

LITTLE DAUGHTER FOLLOWS "SUIT" BECAUSE MUMMY HAS DECIDED IT'S A SUIT SEASON

By Ellen Worth

Here she is showing just how attractive and practical her new model coat can be.

Ornamentally it was carried out in light-weight woolen in red and brown mixture.

The jacket has enough warmth to wear well.

The jacket has enough warmth to wear well.

Wool jersey dress with the jacket of velveteen is another attractive choice.

Style No. 675 is designed for sizes 8, 10, 12, 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 44, 46, 48, 50, 52, 54, 56, 58, 60, 62, 64, 66, 68, 70, 72, 74, 76, 78, 80, 82, 84, 86, 88, 90, 92, 94, 96, 98, 100, 102, 104, 106, 108, 110, 112, 114, 116, 118, 120, 122, 124, 126, 128, 130, 132, 134, 136, 138, 140, 142, 144, 146, 148, 150, 152, 154, 156, 158, 160, 162, 164, 166, 168, 170, 172, 174, 176, 178, 180, 182, 184, 186, 188, 190, 192, 194, 196, 198, 200, 202, 204, 206, 208, 210, 212, 214, 216, 218, 220, 222, 224, 226, 228, 230, 232, 234, 236, 238, 240, 242, 244, 246, 248, 250, 252, 254, 256, 258, 260, 262, 264, 266, 268, 270, 272, 274, 276, 278, 280, 282, 284, 286, 288, 290, 292, 294, 296, 298, 300, 302, 304, 306, 308, 310, 312, 314, 316, 318, 320, 322, 324, 326, 328, 330, 332, 334, 336, 338, 340, 342, 344, 346, 348, 350, 352, 354, 356, 358, 360, 362, 364, 366, 368, 370, 372, 374, 376, 378, 380, 382, 384, 386, 388, 390, 392, 394, 396, 398, 400, 402, 404, 406, 408, 410, 412, 414, 416, 418, 420, 422, 424, 426, 428, 430, 432, 434, 436, 438, 440, 442, 444, 446, 448, 450, 452, 454, 456, 458, 460, 462, 464, 466, 468, 470, 472, 474, 476, 478, 480, 482, 484, 486, 488, 490, 492, 494, 496, 498, 500, 502, 504, 506, 508, 510, 512, 514, 516, 518, 520, 522, 524, 526, 528, 530, 532, 534, 536, 538, 540, 542, 544, 546, 548, 550, 552, 554, 556, 558, 560, 562, 564, 566, 568, 570, 572, 574, 576, 578, 580, 582, 584, 586, 588, 590, 592, 594, 596, 598, 600, 602, 604, 606, 608, 610, 612, 614, 616, 618, 620, 622, 624, 626, 628, 630, 632, 634, 636, 638, 640, 642, 644, 646, 648, 650, 652, 654, 656, 658, 660, 662, 664, 666, 668, 670, 672, 674, 676, 678, 680, 682, 684, 686, 688, 690, 692, 694, 696, 698, 700, 702, 704, 706, 708, 710, 712, 714, 716, 718, 720, 722, 724, 726, 728, 730, 732, 734, 736, 738, 740, 742, 744, 746, 748, 750, 752, 754, 756, 758, 760, 762, 764, 766, 768, 770, 772, 774, 776, 778, 780, 782, 784, 786, 788, 790, 792, 794, 796, 798, 800, 802, 804, 806, 808, 810, 812, 814, 816, 818, 820, 822, 824, 826, 828, 830, 832, 834, 836, 838, 840, 842, 844, 846, 848, 850, 852, 854, 856, 858, 860, 862, 864, 866, 868, 870, 872, 874, 876, 878, 880, 882, 884, 886, 888, 890, 892, 894, 896, 898, 900, 902, 904, 906, 908, 910, 912, 914, 916, 918, 920, 922, 924, 926, 928, 930, 932, 934, 936, 938, 940, 942, 944, 946, 948, 950, 952, 954, 956, 958, 960, 962, 964, 966, 968, 970, 972, 974, 976, 978, 980, 982, 984, 986, 988, 990, 992, 994, 996, 998, 1000, 1002, 1004, 1006, 1008, 1010, 1012, 1014, 1016, 1018, 1020, 1022, 1024, 1026, 1028, 1030, 1032, 1034, 1036, 1038, 1040, 1042, 1044, 1046, 1048, 1050, 1052, 1054, 1056, 1058, 1060, 1062, 1064, 1066, 1068, 1070, 1072, 1074, 1076, 1078, 1080, 1082, 1084, 1086, 1088, 1090, 1092, 1094, 1096, 1098, 1100, 1102, 1104, 1106, 1108, 1110, 1112, 1114, 1116, 1118, 1120, 1122, 1124, 1126, 1128, 1130, 1132, 1134, 1136, 1138, 1140, 1142, 1144, 1146, 1148, 1150, 1152, 1154, 1156, 1158, 1160, 1162, 1164, 1166, 1168, 1170, 1172, 1174, 1176, 1178, 1180, 1182, 1184, 1186, 1188, 1190, 1192, 1194, 1196, 1198, 1200, 1202, 1204, 1206, 1208, 1210, 1212, 1214, 1216, 1218, 1220, 1222, 1224, 1226, 1228, 1230, 1232, 1234, 1236, 1238, 1240, 1242, 1244, 1246, 1248, 1250, 1252, 1254, 1256, 1258, 1260, 1262, 1264, 1266, 1268, 1270, 1272, 1274, 1276, 1278, 1280, 1282, 1284, 1286, 1288, 1290, 1292, 1294, 1296, 1298, 1300, 1302, 1304, 1306, 1308, 1310, 1312, 1314, 1316, 1318, 1320, 1322, 1324, 1326, 1328, 1330, 1332, 1334, 1336, 1338, 1340, 1342, 1344, 1346, 1348, 1350, 1352, 1354, 1356, 1358, 1360, 1362, 1364, 1366, 1368, 1370, 1372, 1374, 1376, 1378, 1380, 1382, 1384, 1386, 1388, 1390, 1392, 1394, 1396, 1398, 1400, 1402, 1404, 1406, 1408, 1410, 1412, 1414, 1416, 1418, 1420, 1422, 1424, 1426, 1428, 1430, 1432, 1434, 1436, 1438, 1440, 1442, 1444, 1446, 1448, 1450, 1452, 1454, 1456, 1458, 1460, 1462, 1464, 1466, 1468, 1470, 1472, 1474, 1476, 1478, 1480, 1482, 1484, 1486, 1488, 1490, 1492, 1494, 1496, 1498, 1500, 1502, 1504, 1506, 1508, 1510, 1512, 1514, 1516, 1518, 1520, 1522, 1524, 1526, 1528, 1530, 1532, 1534, 1536, 1538, 1540, 1542, 1544, 1546, 1548, 1550, 1552, 1554, 1556, 1558, 1560, 1562, 1564, 1566, 1568, 1570, 1572, 1574, 1576, 1578, 1580, 1582, 1584, 1586, 1588, 1590, 1592, 1594, 1596, 1598, 1600, 1602, 1604, 1606, 1608, 1610, 1612, 1614, 1616, 1618, 1620, 1622, 1624, 1626, 1628, 1630, 1632, 1634, 1636, 1638, 1640, 1642, 1644, 1646, 1648, 1650, 1652, 1654, 1656, 1658, 1660, 1662, 1664, 1666, 1668, 1670, 1672, 1674, 1676, 1678, 1680, 1682, 1684, 1686, 1688, 1690, 1692, 1694, 1696, 1698, 1700, 1702, 1704, 1706, 1708, 1710, 1712, 1714, 1716, 1718, 1720, 1722, 1724, 1726, 1728, 1730, 1732, 1734, 1736, 1738, 1740, 1742, 1744, 1746, 1748, 1750, 1752, 1754, 1756, 1758, 1760, 1762, 1764, 1766, 1768, 1770, 1772, 1774, 1776, 1778, 1780, 1782, 1784, 1786, 1788, 1790, 1792, 1794, 1796, 1798, 1800, 1802, 1804, 1806, 1808, 1810, 1812, 1814, 1816, 1818, 1820, 1822, 1824, 1826, 1828, 1830, 1832, 1834, 1836, 1838, 1840, 1842, 1844, 1846, 1848, 1850, 1852, 1854, 1856, 1858, 1860, 1862, 1864, 1866, 1868, 1870, 1872, 1874, 1876, 1878, 1880, 1882, 1884, 1886, 1888, 1890, 1892, 1894, 1896, 1898, 1900, 1902, 1904, 1906, 1908, 1910, 1912, 1914, 1916, 1918, 1920, 1922, 1924, 1926, 1928, 1930, 1932, 1934, 1936, 1938, 1940, 1942, 1944, 1946, 1948, 1950, 1952, 1954, 1956, 1958, 1960, 1962, 1964, 1966, 1968, 1970, 1972, 1974, 1976, 1978, 1980, 1982, 1984, 1986, 1988, 1990, 1992, 1994, 1996, 1998, 2000, 2002, 2004, 2006, 2008, 2010, 2012, 2014, 2016, 2018, 2020, 2022, 2024, 2026, 2028, 2030, 2032, 2034, 2036, 2038, 2040, 2042, 2044, 2046, 2048, 2050, 2052, 2054, 2056, 2058, 2060, 2062, 2064, 2066, 2068, 2070, 2072, 2074, 2076, 2078, 2080, 2082, 2084, 2086, 2088, 2090, 2092, 2094, 2096, For Baby's sake

From the St. Vincent Arrow-root Flour down to the sugar and salt used in making Christie's Arrowroot Biscuits . . . all the ingredients are of the very finest quality and scrupulously pure. They're safe for your baby.

Christie's Biscuits

"There's a Christie Biscuit for every taste"

MISS ALADDIN

—By—
Christine Whiting Farnam
Author Of
"One White River To Cross"
"The Unknown Port," Etc.

SYNOPSIS

Nancy is a sub-a-sub, a gassy, irresponsible girl of nineteen, with no care beyond the choice of her costumes and the number of suitors. Suddenly, in the market crash, her indulgent father loses all he had, and she finds herself in a state of misery at a simpler method of living. At this juncture a letter is received from Uncle Matt, who has come to see her, who offers the girl a home on what seems to be impossible conditions.

After much consideration Cousin Columbine's offer is accepted. Nancy and Jas arrive in Pine Ridge. Nancy set out one afternoon to climb to the top of a hill so as to obtain a better view of surrounding landscapes and misses the path Aurora Tubbs had told her to follow. A truck comes along and picks up the two, and they look at a huge billiard table. Who would believe that there are messes and hills out here?"

"I like the prettier better from a distance," confesses her brother. "They're so desecrated and ruined, you know. Misses makes you feel no bigger than midgets, and about as important! It's great to come out here and see them; but give me the mountains as a steady sit."

The boy paused, brushing one hand against his hair. "I'm glad to see Cousin Columbine's," said Jas.

"I've been there, happened to go there, but I don't know if it amounts to very much. Nance peered curiously at the heavens. "Just see that cloud, Jack! How fast it's moving. I bet that's where your snowflake came from."

A worried wrinkle appeared between his brows. "Skip back into his bus, kid," he shuddered, "we're coming too."

"Maybe Cousin Columbine was right, and we're in for a storm."

Nancy laughed.

"On the prairie in a blizzard on the twenty-sixth of March! It would be some story to tell the folks back home!"

Jack said, his eyes following the cloud: "Don't worry, Nance. The snow's coming in, and it'll melt away."

"It's been so long since we had any snow," said Jas.

"Nance, I think we could have a snowfall for her in Boston."

Nancy's parents and Jas gave their liberal support to her idea for books, and a sizeable box arrived in due time. Jas and Nance made a sign for the library, and the Adam boys worked on the shelves for the books, determined to make the room look presentable.

Jack Nelson, Matthew Adam, and Nancy were the only ones left when 'Uncle' for the ride, and after Nance and Jack leave for home, they are caught in a blizzard.

New Go On With The Story

CHAPTER XVII

The ride to Prairie Ranch had been a jolly one, and a new experience to the young Nelsons. "Uncle Tom and Aunt Emily" welcomed them warmly, and suggested that they stay a day or two, so Mark would be glad of the chance to come and get him; but really I'd feel easier to go back to-day."

"He's right, Matthew," commented Uncle Tom. "It's not quite fair for me to leave two of your family and his, but we'll wait. And as Jack says, it's better for them to start soon and take their time. Run up and say a word to Mark, you two."

"I'll Tell Anybody Gin Pills are Good"

writes a Lunenburg, N.S., man who had suffered from Rheumatism for many years. "I cannot praise Gin Pills enough. After using them I am now able to go around without a cane."

If your kidneys are not efficiently disposing of the waste matter in your system excessive acidity may develop, resulting in painful joints and aches, lameness, the first sign of kidney trouble take

FOR THE KIDNEYS

It. We—we can't miss it. Do you understand?"

Nance understood only too well. There followed a mile or so while the two of them trudged on, with the glass, which her sister, staring into the wind-swept space, fought terror. Snow was descending fast and furiously now. Indeed, as that kept on steadily it seemed to crest, and this was when Nance heard that had transpired so short a time before with friendly sunlight dappling the plains on every side. It might, thought Nancy, have been snowing here for hours and hours. "I wonder if we're still on the road?" Straining her eyes into the drifting white, watching in desperation for the waymarked box, visions of frozen cattle rose up before her, and the girls shuddered.

At last Jack said, not looking at his sister: "We've missed that ranch, Nancy. It can't have been as far as us. What way turn back now and try to reach the road again?"

"I don't know, but I'd like to think we would return so soon."

"These plains are such surprising things," said Nancy, when Prairie Ranch and its big billiard table were behind them. "I wonder if the horses would like that as a huge billiard table. Who would believe that there are messes and hills out here?"

"I like the prettier better from a distance," confessed her brother. "They're so desecrated and ruined, you know. Misses makes you feel no bigger than midgets, and about as important! It's great to come out here and see them; but give me the mountains as a steady sit."

The boy paused, brushing one hand against his hair. "I'm glad to see Cousin Columbine's," said Jas.

"I've been there, happened to go there, but I don't know if it amounts to very much. Nance peered curiously at the heavens. "Just see that cloud, Jack! How fast it's moving. I bet that's where your snowflake came from."

"I like the prettier better from a distance," confessed her brother. "They're so desecrated and ruined, you know. Misses makes you feel no bigger than midgets, and about as important! It's great to come out here and see them; but give me the mountains as a steady sit."

The words were silent by a curt whisper, a cry of warning that came too late. Jack jammed on the brakes so suddenly that his sister was thrown forward against the windshield just as the car collided with the engine of a big school bus, which stood, its back wheels resting in a snow-filled gully as it extended across the road.

CHAPTER XVIII

As Nancy righted herself again her eyes met Jack's, a glint of stark despair passing between them. "I'm afraid that crash has finished this old car," he told her; then added: "Why, Nance, I think that bus hit us."

"Hi, there!" came a voice almost at his elbow. "Had a smash up, didn't you? Did you meet Clem?"

Jack turned to see a boy of perhaps eleven, standing amid the snowdrifts.

"Hi, there!" he called, waving his hand over his head, cold legs. The bus was shaking with each gust of wind, and though every window was thick with frost, she knew that the sound had increased in fury.

(To Be Continued)

ones, however, grew noticeably quiet as time passed, trying to peer out of the snow-covered windows, and speaking together in low voices.

At last Jack and Tom Osgood started some walking exercises at the rear of the bus; while the older girls roused themselves in an effort to keep the others occupied. They dashed, jumped up, and down, and pranced, while the younger girls, in exercise they were growing colder every minute, and when during some roughhouse, a small boy's elbow went through a pane of glass, a cry of distress arose from one and all.

It was then that the bus had an inspiration. Stored under the back seat and carried for just such emergencies, were canned food and a small, portable stove.

"We've got to think of something," he observed.

"We've never had a chance to use 'em, and I guess everyone forgot," he observed.

"I guess we'll have to think of something else," he said, his voice little more than a whisper.

"Why aren't we here? Not anywhere! We've always carried 'em and extra blankets too. Say! I know what we'll do."

He had been running his hands over his shoulder, his fingers clenched, as if he were about to burst into a fit of rage.

"I'm going to make a stove out of this milk can. We'll soon be opening windows to cool off!"

Nancy, too, was attempting to cheer, and lifting the crying child onto her lap, wrapped her coat about the small, cold legs. The bus was shaking with each gust of wind, and though every window was thick with frost, she knew that the sound had increased in fury.

The bus was a small set of rods inscribed with figures. By means of these things multiplication, division, and other mathematical processes may be performed by the initiate. The method of using them was invented, and explained in a treatise, by John Napier, of Edinburgh, the year 1617. The rods can be expected to know anything of Napier and his bones.

TOWN AND PROVINCE

Here and There

What a practical newspaperman finds interesting on a cruise around the world in the Canadian Pacific flagship Empress of Britain. The ship's passengers are the source of the cruise. He saw intriguing people and places outstanding people and places. He wrote a book which is illustrated with photographs he made with his own camera. It is full of amusing sidelights upon humanity under the comprehensive title "A Day in the Life of a Seafaring Man." The book is on Macmillan's fall list.

That United States investors' confidence in the Canadian market is an even greater volume is the prediction of John R. Hastie, of the Canadian office of the New York Stock Exchange, speaking before the Underwriters Association of America at the Royal York Hotel recently.
